Summary

This is a Web site to display information about The Paint Gallon. The possible audience of the Website include contractors, designers, architects, and customers who want to gain information about home decor. The audience can explore about the trending colours, paint products, customer services, information based on customer type and contact details.

- HTML Pages: pg_home.html (Home Page), pg_products.html (Products Page), pg_services.html (Services Page), pg_professionals.html (Professionals Page), pg_contacts.html (Contact Page)
- CSS: pg_reset.css (reset the structural styles), pg_styles.css (includes body, header, and footer styles), pg_grids.css (includes rows and columns styles), pg_forms.css (style for form elements).
- Javascript: pg_clock.js (displays countdown for sale on products page), pg_designers.js (displays picture slideshow on Professionals page).

Web Pages:

- Page 1 (Home page): It includes colour trends, colour wheel insights, a look at paint finishes, and latest trends in painting walls section. The entire page is in grid layout and includes images, video, and text. Colour trends section shows image transition on hover over colour images. The contents of body changes for different window sizes.

- Page 2 (Products page): A brief description on different products available for customers. Include sections on product types such as interior products, exterior products etc. It includes

clock countdown section that uses javascript to display time left for sale end. It has rows of different product types. The contents of body changes for different window sizes.

- Page 3 (Services page): A brief description about the services provided by The Paint Gallon. Include sections on delivery, providing solutions, design services and colour consultation and many more services. It may include the contacts details of consultants.

- Page 4 (Professionals Page): A brief introduction about information specific to customer type. Include sections on Contractors, Designers and Architects, slideshow displaying pictures and information on portfolio App etc. It has three sections with overlay text displayed on each of Contractors, Designers and Architects. Javascript is used to display a slideshow of photos (not covered in class).

- Page 5 (Contact page): A brief information on contact details. Include section to submit query using form element. Form on submit event is used to display alert message of successful form submission. It also includes email validation.
